Upcoming IEEE Young Professionals Program

We are happy to announce the Vertical Track on "Young Professional" at the 7th Annual IEEE World Forum on Internet of Things (WFIoT2021) on June 23, 2021 in New Orleans, LA, at the Hilton Riverside Hotel, 16.00/18.00

The IEEE WFIoT website is available here: https://wfiot2021.iot.ieee.org

During the afternoon and evening sessions, we will cover:

- The IEEE Young Professionals program and how to access its global network
- Insightful industry talks from young professionals and mentors on breaking into and building careers at Fortune 500 technology firms
- Importance of career growth and networking for landing the next opportunities
- Overview of individual contributor and management career paths, horizontal and vertical roles, rotations, and job satisfaction
- Importance of networking in landing new roles, transitioning into new industries
- “Ask Me Anything” session for any career related advice

We will close with a very informal networking event with refreshing drinks and snacks on offer, giving the opportunity to meet up with speakers and the rest of the audience of the IEEE World Forum on IoT, locally and internationally (via Google Meet). Local young professionals and university students and professors are especially welcome!

The session will take a hybrid form with an onsite and international virtual audience from IEEE’s worldwide membership and non-members from government, industry, academia and community associations.

Preeti Chauhan, Chair of the YP Vertical Track, WFIoT2021
Adam Drobot, Chair of Vertical and Topical Tracks, WFIoT2021
