

Dear DEIS member

As you probably know, starting January 1st, 2022, DEIS has joined the IEEE Transportation Electrification Community (IEEE TEC) as a core member, see the website: <https://tec.ieee.org/>

This participation will provide some benefits to DEIS members, one of which is individual complimentary registration to IEEE TEC, starting from 2022.

When you renew your DEIS membership for 2022 you could join the IEEE TEC for free. Soon the IEEE renewal website will be automatically updated to take into account this option, BUT in the meantime, you can use the complimentary code **TECCOMP2022** to include also the IEEE TEC in your registration, free for DEIS members. The code should be inserted in the "promotion code" box which appears in the IEEE registration web page just before finalization. If you have already renewed your DEIS 2022 membership, you can still join IEEE TEC by following the instruction reported here: <https://tec.ieee.org/membership>. Please use the complimentary code reported above.

We hope you could take benefit of this opportunity.

Yours sincerely,

IEEE DEIS
